

**Executive Director and
Head of Real World Evidence Solutions (RWE-S)**

**GENESIS RESEARCH
Hoboken, NJ**

Genesis Research is an international healthcare consultancy providing end-to-end value evidence strategy, development, and communication services to Life Sciences companies. We are looking for an individual with demonstrated leadership, biopharma industry experience, and strong methodological skills to lead a growing team (currently 25) of analysts, statisticians, epidemiologists and RWE scientists.

Our RWE-S team has seen exceptional growth and success in providing holistic and comprehensive support to Life Science organizations. The professional leading this team must possess and demonstrate a passion for innovative research, maintain accountability for all RWE deliverables, develop RWE scientists and research teams, and cultivate key client relationships in the pharmaceutical, biotechnology and medical device sectors. This person must understand the needs of clients' internal and external stakeholders and leverage this understanding to suggest and design value-added, fit-for-purpose research approaches. This role reports to the Chief Operating Officer.

Location: Hoboken, NJ, USA, although remote locations may be considered. Local and international travel of up to 20% is required.

Accountabilities within this role:

- Provide scientific and methodological direction for all observational research and RWE generation at Genesis Research
- Regularly interface with clients and drive business through the generation of high-quality deliverables
- Optimize research processes, evidence generation, QC, and deliverables which include but are not limited to:
 - RWE Generation (including Study Design, Protocol Development and Result Interpretation)
 - Chart Reviews
 - Indirect Comparisons (NMA, MAIC, etc)
 - Strategic Planning and Guidance
 - Protocol Development
 - Reports and Scientific Communications
 - Data Visualization
- Supervise execution of projects within a matrix environment, including coordinating project activities, participating in client-facing project meetings, providing guidance and leadership when analyzing research findings, developing results presentations and recommendations, and validating all RWE-S deliverables
- Innovate and assist in the development of high-quality client deliverables in a timely manner such as presentation slide decks, technical reports, briefing books, conference abstracts and manuscripts for publications

Qualifications:

- Masters degree or PhD within a relevant discipline (statistics, epidemiology, pharmacology)
- 8+ years industry or consulting experience
- Experience generating and interpreting real-world and observational research required
- Excellent verbal and written communication skills
- Proficiency in relevant software such as MS office (Word, Excel and PowerPoint) and statistical packages
- Exceptional organizational skills and attention to detail
- Enthusiasm to learn and motivation to develop oneself and others within Genesis Research
- Ability to effectively work in a matrix environment and flexibility to adapt to client project needs in a fast-paced, entrepreneurial workplace

Compensation:

Competitive salary

Performance-related bonus

401k plan

Medical/dental benefits

This position is eligible for equity options

Genesis Research is an equal opportunity employer.
